**FOR IMMEDIATE RELEASE**  
**Summit County Falls Back to Risk Level 2/ Orange**

[Akron, OH] –Summit County Public Health was notified Thursday afternoon that Summit County has moved down to Risk Level 2/ Orange from Risk Level 3/ Red in the Ohio Public Health Advisory System. The Level 2 Risk designation means that there is increased risk and exposure of Covid-19 in Summit County. SCPH would like to thank the residents of Summit County for their diligence in preventing the spread of COVID-19 and helping us move to Level 2.

Due to the statewide masking order taking effect July 23, 2020 masks are still mandatory in Summit County even though we are currently at Level 2. Masking is mandatory in any indoor location that is not a residence; Outdoors and unable to consistently maintain a distance of six feet or more from individuals who are not members of their household; waiting for, riding, driving or operating public transportation, a taxi, a private car service or ride sharing vehicle. This does not apply to vehicles engaged in direct travel through a county that does not stop in that county.

The Ohio Public Health Advisory System was established to increase the information available to Ohioans about Covid-19 risk at the county level. Seven indicators are analyzed to assess risk for each county. The indicators are as follows:

1. New Cases Per Capita – Flagged if greater than 50 cases per 100,000 residents over the last two weeks.
2. Sustained Increase in New Cases – Flagged if increasing trend of at least 5 days in overall cases by onset date.
3. Proportion of Cases Not Congregate Cases – Flagged if proportion of cases that are not in a congregate setting goes over 50%.
4. Sustained Increase in Emergency Room Visits – Flagged if increasing trend of at least 5 days in the number of visits to the emergency department with Covid-like illness or a diagnosis.
5. Sustained Increase in Outpatient Visits - Flagged if increasing trend of at least 5 days in the number of people going to a health care provider with Covid symptoms who then receive a Covid confirmed or suspected diagnosis.
6. Sustained Increase in New Covid-19 Hospital Admissions – Flagged if increasing trend of at least 5 days in the number of new hospitalizations due to Covid.
7. Intensive Care Unit (ICU) Bed Occupancy – Flagged if percentage of occupied ICU beds in each region goes above 80% for at least three days in the last week.

Level 2 is reached when a county triggers 2-3 of the above indicators. The indicators triggered in Summit County are as follows:

1. New Cases Per Capita – Flagged if greater than 50 cases per 100,000 residents over the last two weeks.
2. Proportion of Cases Not Congregate Cases – Flagged if proportion of cases that are not in a congregate setting goes over 50%.
3. Sustained Increase in Outpatient Visits - Flagged if increasing trend of at least 5 days in the number of people going to a health care provider with Covid symptoms who then

Residents should follow the recommended guidelines for Risk Level 2 to reduce the spread of COVID-19:

- Conduct a daily health/symptom self-evaluation and stay at home if symptomatic.
- Maintain social distancing of at least 6 feet from non-household members.
- Consider necessary travel only.
- Follow good hygiene standards, including:
  - Wash hands frequently with soap and water for at least 20 seconds.
  - Use hand sanitizer frequently.
  - Avoid touching your face.
  - Cover coughs or sneezes (e.g., into a tissue, or elbow).
  - Symptom self-evaluation monitoring.
- Decrease in-person interactions with others.
- Limit attending gatherings of any number.
- Seek medical care as needed, but limit or avoid unnecessary visits to hospitals, nursing homes, and residential care facilities to see others as much as possible.
- It is very important to remember if you have had a COVID-19 test and are awaiting the results **please stay home** and limit outings until you have received your tests results so you do not unknowingly spread the virus.
