COVID-19 Levels and Transmission Rates, Current Week

Community Level:

This map shows hospital utilization based on the new case rate over the last 7 days.

Key:

- Green - Low level
- Yellow - Medium level
- Orange - High level

Community Transmission:

This map shows how quickly COVID-19 is spreading.

Key:

- Blue - Low transmission
- Yellow - Moderate
- Orange - Substantial
- Red - High transmission

COVID-19 Case Data: Public health data can be presented in different ways. For COVID-19 case reporting, Summit County Public Health (SCPH) reports case count data by the date each case is reported. This provides SCPH and community partners a real-time picture of case reporting and public health response, such as case interviews, contract tracing, outbreak investigations and mitigation efforts. Summit County reports confirmed and probable cases that are active cases at time of reporting, and does not include cases reported due to positive antibody test results.

Note 1: The Ohio Department of Health (ODH) reports data the date that symptoms were first experienced (onset date) for all confirmed and probable cases. Case counts by onset date (also known as an epidemiological curve) provides valuable information on the dynamics of disease transmission and outbreaks. However, the data in the most recent two weeks of the onset date curve will be incomplete, as many of the cases first experiencing symptoms on those dates have not yet been diagnosed and/or reported to the health department. Therefore, data by onset date will not be shown for the most current 2-week period.
