Help Keep Illness from Spreading

Take actions every day to help prevent the spread of respiratory viruses like cold and flu:

Wash your hands often with soap and water for at least 20 seconds — especially after using the bathroom or blowing your nose, and before eating.

If soap and water are not available, use an alcohol-based hand sanitizer with at least 60% alcohol.

Cover your cough or sneeze into your elbow or a tissue.

Don't touch your eyes, nose or mouth with unwashed hands.

Stay away from people who are sick.

Stay home when you are sick.

Clean and disinfect objects and surfaces regularly.
