

Summit County Public Health Influenza Surveillance Report 2025 – 2026 Season

Report #15

Flu Surveillance Weeks 16 & 17 (1/18/2026 to 1/31/2026) Centers for Disease Control and Prevention MMWR Weeks 3 & 4

Public Health
Prevent. Promote. Protect.

Summit County Surveillance Data:

In Weeks 16 & 17 of influenza surveillance, influenza-related activity is decreasing in Summit County.

Table 1: Overall Influenza Activity Indicators in Summit County by week				
	Week 16 MMWR 3 N (%) ¹	Week 17 MMWR 4 N (%) ¹	Percent change from previous week	Number of weeks increasing or decreasing
Lab Reports: Influenza				
<u>Test Performed</u>	1283	1085	-15.4%	4↓
<u>Positive Tests (Number and %)</u>	258 (20.1%)	188 (17.3%)	-13.8%	2↓
Influenza A (Number and %)	164 (12.8%)	86 (9.4%)	-26.5%	5↓
Influenza B (Number and %)	94 (7.3%)	86 (7.9%)	8.2%	4↑
<u>Acute care hospitalizations for Influenza:</u>	45	35	-22.2%	5↓
Schools absenteeism²	-	-	-	-
Deaths (occurred in Summit County)^{***}				
Pneumonia associated	-	-	***	-
<u>Influenza associated</u>	-	-	***	-
COVID-19 associated	-	-	***	-
Emergency room visits (EpiCenter)³ (Figure 3)^{**}				
Total ED Visits	6308	5431	-13.9%	3↓
Constitutional Complaints	735	627	-0.9%	5↓
<u>Fever and ILI</u>	117	91	-9.7%	1↓
1) School Absence is for any reason. Percent is from total number of students enrolled. Data was collected from approx. 6 schools or school districts throughout Summit County (n = approx. 30,000 students) 2) Notable changes in Epicenter data are the result of a change in reporting practices from at least one of the reporting facilities. **These figures should not be compared to previous year's reports** Notable decrease/ elimination of ER Related data may be the result of a reporting delay and not reflective of actual trends. This will be revised in future reports. Note: Data is provisional and may be updated as more information is received. Data displayed in all sections of this table, apart from Emergency Room visits, is voluntarily provided by participating facilities located in Summit County. Percentages should be interpreted with caution. Small changes in number can result in large changes in percent. When a percentage, or prevalence, is available in this table, the percent change will be calculated from those values				

Lab reports:
During week 16 and 17 of influenza surveillance, reporting Summit County facilities performed 2,368 tests of which, 446 had positive results. **(Figure 4) Note: Influenza data are collected from selected reporting partners and do not represent positivity rates for the entire county.**

Acute Care Hospitalizations:
There were 80 reported hospital admissions during weeks 16 and 17. **Figure 2** displays hospitalizations in Summit County.

School absenteeism:
Includes absences regardless of reasoning. School attendance was affected by weather related school cancellations and cannot be reported at this time.

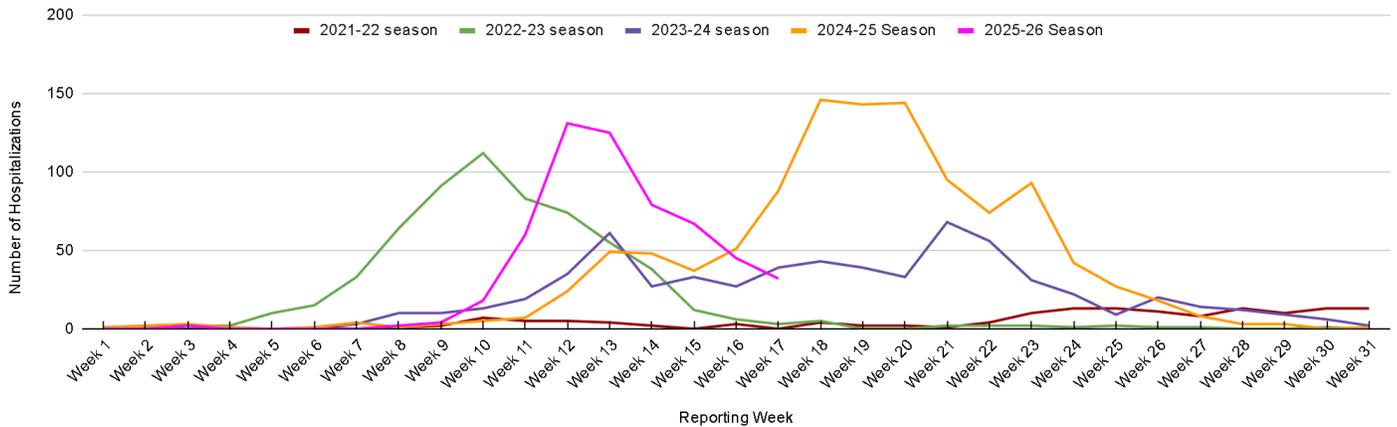

*****Changes to the way that respiratory illness associated deaths are recorded has resulted in a pause in reporting new death counts. This section will be updated at a later date, if applicable.**

Figure 1*** displays weekly counts of deaths occurring in Summit County associated with pneumonia, COVID-19 and influenza.

Figure not displayed due to incomplete data.

Hospitalizations: In Week 16, participating Summit County hospitals reported 45 influenza-associated hospitalizations. In Week 17 there were 35 new influenza-associated hospitalizations reported. **Figure 2** displays weekly confirmed hospitalization counts for participating Summit County facilities at the time of reporting.

Figure 2. Summit County weekly influenza-associated hospitalizations, 2025-2026 season and previous four seasons

EpiCenter collects and analyzes health related data in real time to provide information about the health of the community. This system tracks ER visits related to constitutional complaints and fever and ILI. **Figure 3** displays the weekly ER visits related to ILI and flu symptoms in Summit County by age group. ****These figures should not be compared to previous year reports. ****

Figure 3. Weekly ED visits in Summit County related to Fever + ILI reported in EpiCenter by Age Group, 2025 to 2026 season

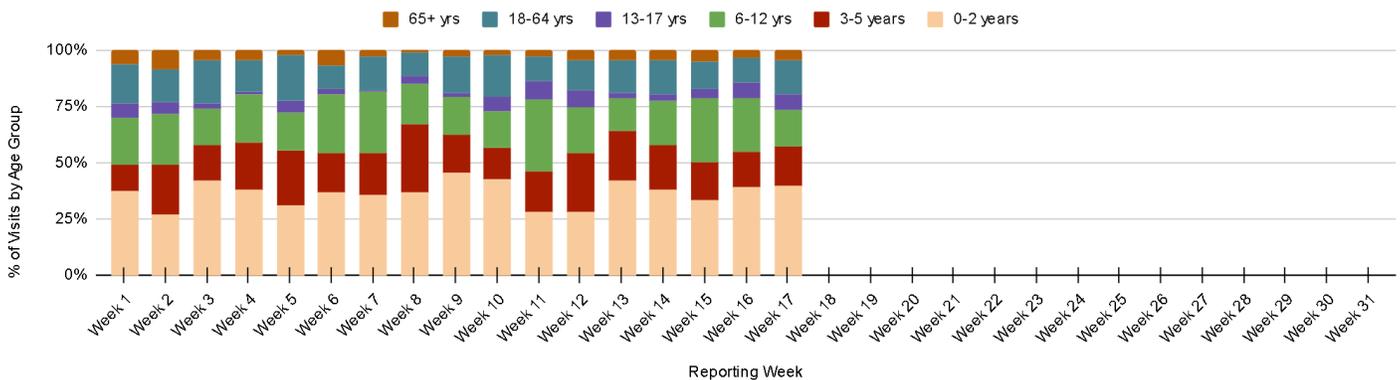

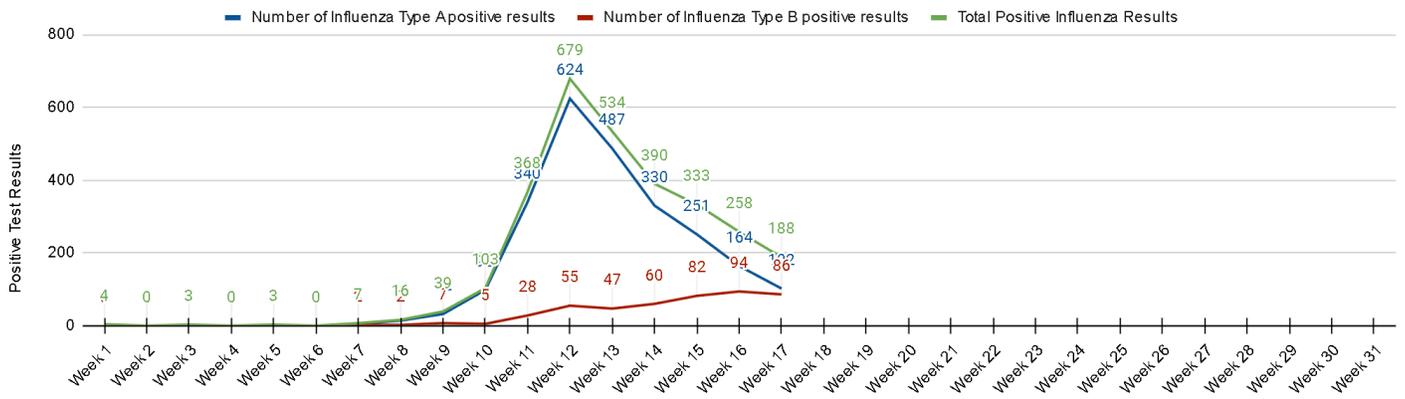

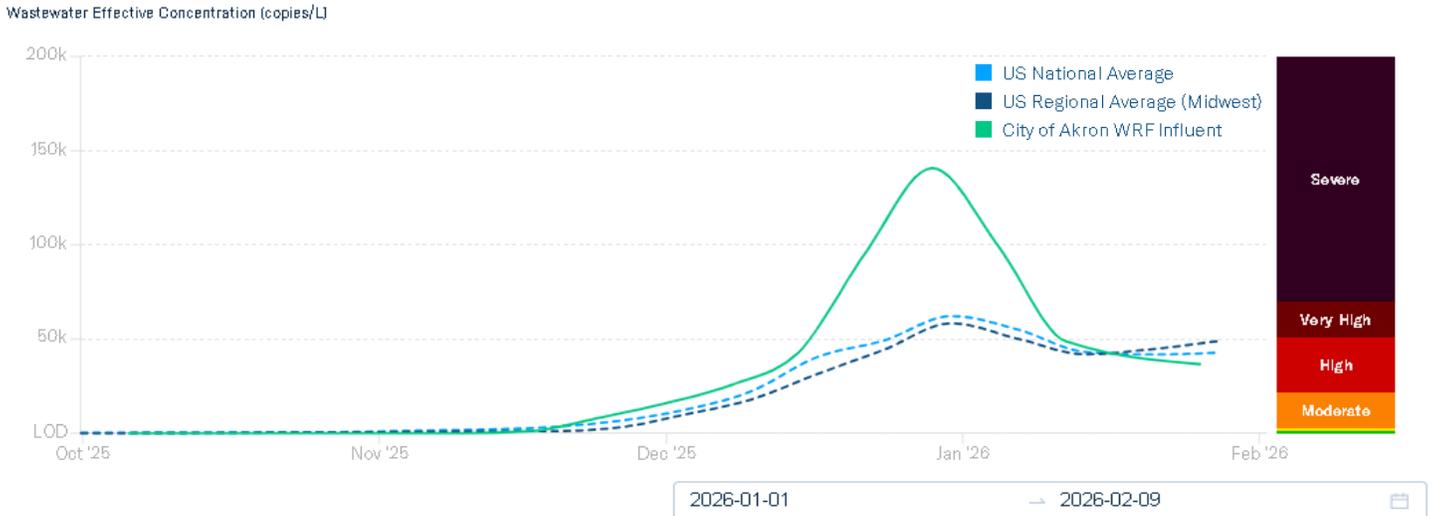

Figure 4. Influenza diagnostic tests with positive results completed by Summit County health facilities, 2025 to 2026 season

Summit County (Akron Water Reclamation Facility) Wastewater Monitoring with Biobot Analytics-

Wastewater Monitoring indicates that the presence of influenza A in the Midwest region and City of Akron are **HIGH**—(Wastewater data last updated February 6, 2026)

Figure 5. Wastewater Effective Concentration (copies/L) of Influenza A for current season (2025-2026):

Note: The H5* influenza and influenza A assays target different genes that make data comparison between the two targets more challenging than using a simple ratio. We do not recommend comparing the concentration of influenza A to the concentration of H5N1.

**Note date ranges for figure 5 and 6 differ as do Copies/L scale—do not directly compare models.

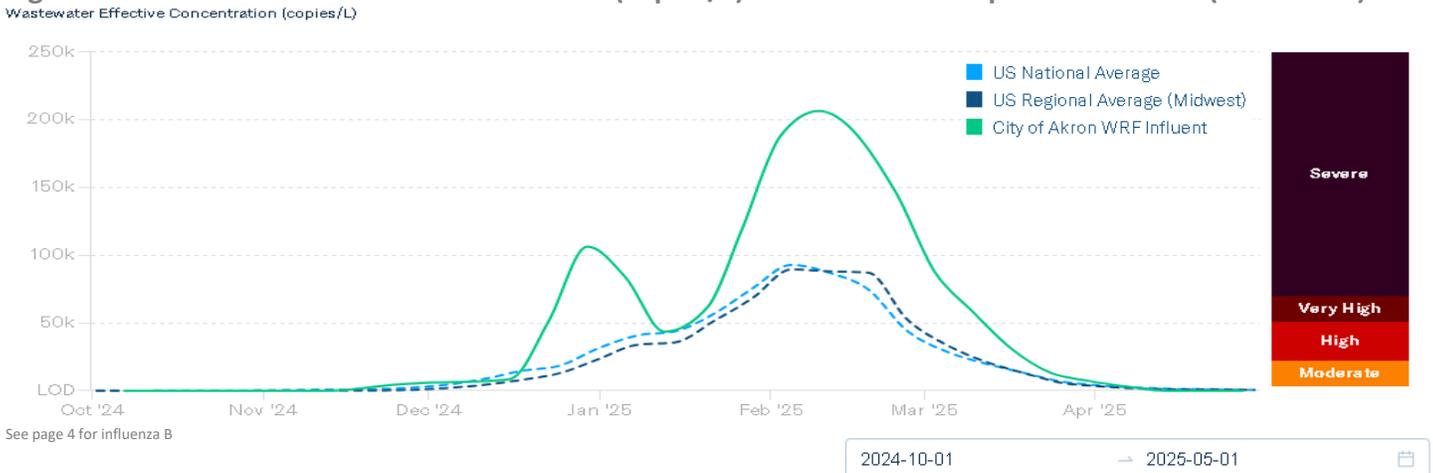

Concentration

copies/L copies/mL

Target

Influenza A Influenza B Influenza H5

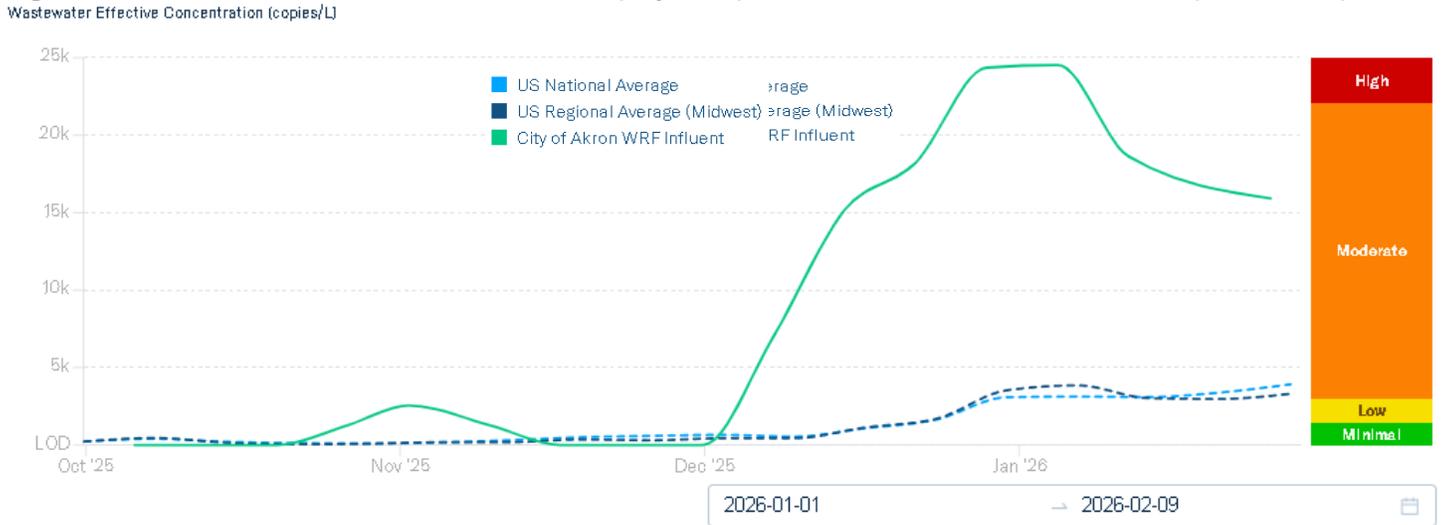

Figure 6. Wastewater Effective Concentration (copies/L) of Influenza A for previous season (2024-2025):

See page 4 for influenza B

Wastewater Monitoring indicates that the presence of influenza B in the Midwest region and City of Akron are Moderate—(Wastewater data last updated February 6, 2026)

Figure 7. Wastewater Effective Concentration (copies/L) of Influenza B for current season (2025-2026):

Note: The H5* influenza and influenza A assays target different genes that make data comparison between the two targets more challenging than using a simple ratio. We do not recommend comparing the concentration of influenza A to the concentration of H5N1

Concentration

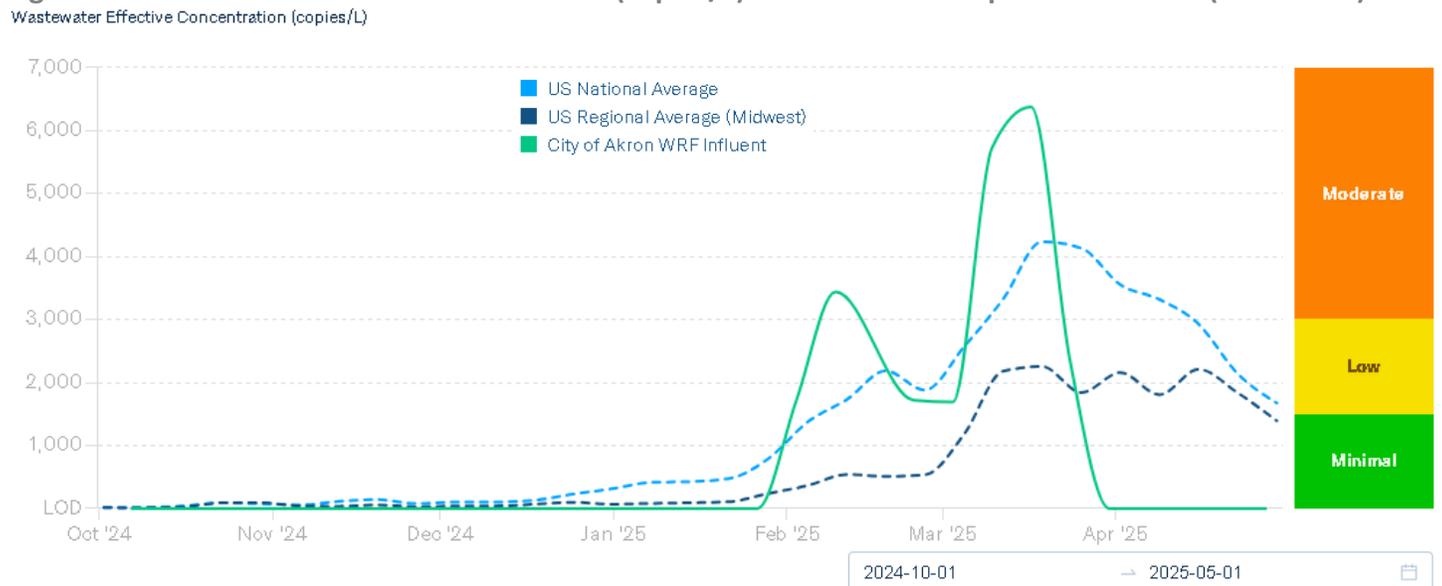

copies/L copies/mL

Target

Influenza A Influenza B Influenza H5

****Note date ranges for figure 7 and 8 differ as do Copies/L scale—do not directly compare models.**

Figure 8. Wastewater Effective Concentration (copies/L) of Influenza B for previous season (2024-2025):

Statewide Infectious Disease Trends and Levels in Wastewater

SARS-CoV-2	Influenza	RSV
Increasing SARS-CoV-2 trends in 3% of monitored facilities. Trend: Decreasing Level: Moderate	High levels of influenza detected in 32% of monitored facilities. Trend: Decreasing Level: High	High levels of respiratory syncytial virus (RSV) detected in 23% of monitored facilities. Trend: N/A* Level: High

*N/A: not available, gathering baseline data

Regional Infectious Disease Trends and Levels in Wastewater

Akron WPCF	SARS-CoV-2	Influenza	RSV
	Trend: Increasing Level: High	Trend: Increasing Level: High	Trend: N/A* Level: Low

- [National Surveillance from Centers for Disease Control and Prevention \(CDC\)](#)- All data in this report are preliminary and may change as more reports are received. A description of the CDC influenza surveillance system, including methodology and detailed descriptions of each data component, is available on the [surveillance methods page.1](#) Additional information on the current and previous influenza seasons for each surveillance component are available on [FluView Interactive](#).
- [World Health Organization Global Influenza Programme – Influenza Update](#)- Surveillance data for influenza and SARS-CoV-2 are shared with WHO through the Global Influenza Surveillance and Response System (GISRS). Each week, these data are reviewed and analyzed by the Global Influenza Programme to provide a global overview of influenza, SARS-CoV-2, and other respiratory virus activity.

About this report: Reporting agencies include labs, hospitals, and schools. Agencies are distributed throughout Summit County and report different indicators of flu activity including total lab tests, numbers of positive tests and type, school absences, and influenza like illness (ILI). Number of deaths associated with influenza and pneumonia are gathered from the Summit County Office of Vital Records death listings. Emergency room visits for complaints related to influenza are obtained by syndromic surveillance system (Epicenter).

Special thanks to all agencies who report Influenza related data weekly.

Reporting from participants may not be complete each week. Numbers may change as updated reports are received. For questions, please contact Julie Zidones at the Summit County Public Health Communicable Disease Unit (330-375-2662 or cdu@schd.org). This report was issued on February 9, 2026.
