

Monthly Communicable Disease Report Summit County June, 2026

Communicable Disease Investigations (Minus Tuberculosis):

- 193 communicable disease investigations were completed.
 - Note: After an investigation has been completed, some reported cases are determined to not be a case. Therefore, the number of cases investigated may not equal the number of reportable conditions in the table below.
 - Disease investigations included 61 cases of Lyme, 25 cases of Hepatitis B - Chronic, 15 cases of Campylobacter, 14 cases of CPO-Enterobacter, 11 cases of Salmonella, 11 cases of Varicella, 10 cases of CPO-Acinetobacter, 6 cases of Strep-Pneumo, 5 cases of CPO-Pseudomonas, 5 cases of Cryptosporidiosis, 3 cases of C. Auris Colonization Screening, 3 cases of Cyclosporiasis, 3 cases of Ebola, 3 cases of Shigellosis, 3 cases of Strep-Group A, 2 cases of E. Coli, 2 cases of Haemophilus influenzae, 2 cases of Legionella, 2 cases of Yersiniosis, and one case each of the following: C. Auris, Coccidiomycosis, Giardiasis, Influenza, Leprosy, Malaria and Meningitis - Bacterial.

Tuberculosis:

- 1 new confirmed case of TB reported.
- 6 cases are being provided Direct Observed Therapy.
- 6 total TB cases currently being followed.
- Contact tracing of these new TB cases yielded 3 new contacts.

Outbreaks:

- 3 new Outbreaks were identified.
- The cause of these outbreaks included: Non-invasive Haemophilus Influenza, Rhinovirus, Scabies
- The location type of outbreaks included: LTC

Epicenter:

- Epicenter is an electronic surveillance system which provides instant notification of unusual symptomatic activity at local emergency departments.
- 7 Epicenter alerts were issued this month.
 - Reasons for these alerts included: Suspected Drug Overdose (5), Respiratory (1), Stiff Neck (1).

Influenza Surveillance: Surveillance for the 2025-2026 flu season has concluded. Reports from previous influenza seasons are available on the SCPH website: <https://www.scph.org/flu-surveillance-reports>

Vector-borne Surveillance: Surveillance for the 2026 season has begun and the first report of the season was issued in June. Copies of the reports for 2025 and previous years may be accessed at: <https://www.scph.org/vector-surveillance-reports>

Communicable Disease Reports Received, June 2026

Reportable Condition	June 2026	May 2026	Year-to-Date 2026	Year-to-Date 2025
Amebiasis	0	0	0	7
Anaplasmosis-Anaplasma phagocytophilum	0	0	0	1
Babesiosis	0	0	0	0
Botulism - infant	0	0	0	0
Botulism, food borne	0	0	0	0
Brucellosis	0	0	0	0
C. auris	1	2	11	8
C. auris - Colonization Screening	7	5	25	21

Vibriosis (not cholera)	0	0	0	1
West Nile virus disease (also current infection)	0	0	0	0
Yersiniosis	1	1	7	12
Zika virus infection	0	0	0	0
Total	436	382	2,476	5,223

**As of 10/1/2025, COVID-19 is no longer a Class B reportable disease in Ohio. See full list of Reportable Disease Classifications at link on page 4.

Notes:

1) This report includes the number of reports of disease received and investigated by Summit County Public Health (SCPH). **This includes all reports that were determined to be probable, suspected, or confirmed.** Based on case investigation, clinical diagnoses, IDCM case definitions, and lab results, the case status may change. NR = not reported in previous year.

2) The Total Year-to-Date column reflects all cases of disease where SCPH is identified as the local health department in the Ohio Disease Reporting System (ODRS) as of the date that data was extracted. This includes the cases of disease entered into ODRS after last month's report was generated which will now be included in the Previous Month Revised column. Data may also vary in response to recent changes in data extraction and analysis. **Because case classifications can change over time, monthly figures should not be considered final until the annual report is complete.**

3) The number of perinatal hepatitis B cases reflect the number of infants born to hepatitis B positive mothers during the reporting period. These infants will be followed by the Perinatal Hepatitis B Prevention Program (PHBPP) until serology indicates that the child has immunity.

The following conditions were removed as reportable conditions by the Ohio Department of Health: Amebiasis, Aseptic Meningitis.
