

Summit County Public Health
Influenza Surveillance Report
2025 – 2026 Season
Report #1

Flu Surveillance Weeks 1 & 2 (10/5/2025 to 10/18/2025)
Centers for Disease Control and Prevention MMWR Weeks 41 & 42

Summit County Surveillance Data:

In **Weeks 1 & 2** of influenza surveillance, influenza-related activity was moderate¹ in Summit County.

Table 1: Overall Influenza Activity Indicators in Summit County by week				
	Week 1 MMWR 41 N (%) ¹	Week 2 MMWR 42 N (%) ¹	Percent change from previous week	Number of weeks increasing or decreasing
Lab Reports: Influenza				
<u>Test Performed</u>	621	635	2.3%	↑
<u>Positive Tests (Number and %)</u>	4 (%)	0 (%)	-100.0%	↓
Influenza A (Number and %)	4 (%)	0 (%)	-100.0%	↓
Influenza B (Number and %)	0 (%)	0 (%)	-	-
<u>Acute care hospitalizations for Influenza:</u>	0	0	-	-
Schools absenteeism²	7.2	8.2	14.1%	↑
Deaths (occurred in Summit County)				
Pneumonia associated	5	10	100.0%	↑
<u>Influenza associated</u>	0	0	-	
COVID-19 associated	0	1	-	↑
Emergency room visits (EpiCenter)³ (Figure 3)**				
Total ED Visits	6798	6987	2.8%	↑
Constitutional Complaints	509	575	9.9%	↑
<u>Fever and ILI</u>	67	92	33.6%	↑
1) School Absence is for any reason. Percent is from total number of students enrolled. Data was collected from approx. 6 schools or school districts throughout Summit County (n = approx. 30,000 students)				
2) Notable changes in Epicenter data are the result of a change in reporting practices from at least one of the reporting facilities. **These figures should not be compared to previous year's reports** Notable decrease/ elimination of ER Related data may be the result of a reporting delay and not reflective of actual trends. This will be revised in future reports.				
Note: Data is provisional and may be updated as more information is received. Percentages should be interpreted with caution. Small changes in number can result in large changes in percent. When a percentage, or prevalence, is available in this table, the percent change will be calculated from those values				

Lab reports:

During week 1 and 2 of influenza surveillance, reporting Summit County facilities performed 1,256 tests of which 4 had positive results. **(Figure 4)**

Note: Influenza data are collected from selected reporting partners and do not represent positivity rates for the entire county.

Acute Care Hospitalizations:

There was no reported hospital admission during weeks 1 and 2. **Figure 2** displays hospitalizations in Summit County.

School absenteeism:

includes absences regardless of reasoning. There was a 14.1% increase in absences from week 1 to 2.

0 deaths related to influenza, 1 COVID-19 related death and 15 pneumonia related deaths occurred in Summit County during weeks 1 and 2.

¹The measure of 'influenza-related activity in Summit County' will be determined based on week to week comparison of table 1 indicators. The scale is as follows: 1/5 indicators increase (very low), 2/5 indicators increase (low), 3/5 indicators increase (moderate), 4/5 indicators increase (high), 5/5 indicators increase (very high).

Figure 1 displays weekly counts of deaths occurring in Summit County associated with pneumonia, COVID-19 and influenza. There have been 0 reported influenza associated deaths in Summit County this surveillance season.

Figure 1. Weekly Summit County death counts associated with pneumonia, COVID-19 and influenza during 2025-2026 season

Hospitalizations: In Week 1, Summit County hospitals reported 0 influenza-associated hospitalizations. In Week 2 there were 0 new influenza-associated hospitalizations. **Figure 2** displays weekly confirmed hospitalization counts for Summit County.

Figure 2. Summit County weekly influenza-associated hospitalizations, 2025-2026 season and previous four seasons

EpiCenter collects and analyzes health related data in real time to provide information about the health of the community. This system tracks ER visits related to constitutional complaints and fever and ILI. **Figure 3** displays the weekly ER visits related to ILI and flu symptoms in Summit County by age group. ***These figures should not be compared to previous year reports. ***

Figure 3. Weekly ED visits in Summit County related to Fever + ILI reported in EpiCenter by Age Group, 2025 to 2026 season

Summit County (Akron Water Reclamation Facility) Wastewater Monitoring with Biobot Analytics-

Wastewater Monitoring indicates that the presence of influenza in the Midwest region and City of Akron are Minimal—(10/24/25)

Figure 5. Wastewater Effective Concentration (copies/L) of Influenza A for current season (2025-2026):

Note: The H5* influenza and influenza A assays target different genes that make data comparison between the two targets more challenging than using a simple ratio. We do not recommend comparing the concentration of influenza A to the concentration of H5N1

****Note date ranges for figure 5 and 6 differ as do Copies/L scale—do not directly compare models.**

Figure 6. Wastewater Effective Concentration (copies/L) of Influenza A for previous season (2024-2025):

- [Ohio Department of Health Respiratory Dashboard](#) - These dashboards display trends across Ohio for COVID-19, Influenza and respiratory syncytial virus (RSV).
- [National Surveillance from Centers for Disease Control and Prevention \(CDC\)](#)- All data in this report are preliminary and may change as more reports are received. A description of the CDC influenza surveillance system, including methodology and detailed descriptions of each data component, is available on the [surveillance methods page.1](#) Additional information on the current and previous influenza seasons for each surveillance component are available on [FluView Interactive](#).
- [World Health Organization Global Influenza Programme – Influenza Update](#)- Surveillance data for influenza and SARS-CoV-2 are shared with WHO through the Global Influenza Surveillance and Response System (GISRS). Each week, these data are reviewed and analyzed by the Global Influenza Programme to provide a global overview of influenza, SARS-CoV-2, and other respiratory virus activity.

About this report: Reporting agencies include labs, hospitals, and schools. Agencies are distributed throughout Summit County and report different indicators of flu activity including total lab tests, numbers of positive tests and type, school absences, and influenza like illness (ILI). Number of deaths associated with influenza and pneumonia are gathered from the Summit County Office of Vital Records death listings. Emergency room visits for complaints related to influenza are obtained by syndromic surveillance system (Epicenter).

Special thanks to all agencies who report Influenza related data weekly.

Reporting from participants may not be complete each week. Numbers may change as updated reports are received. For questions, please contact Julie Zidones at the Summit County Public Health Communicable Disease Unit (330-375-2662 or cdu@schd.org). This report was issued on October 31, 2025.
